Notes:

- See the table, **General and M&P Corporate Income Tax Rates**, for the rates that apply to CCPCs on active business income above \$500,000 (\$600,000 for Saskatchewan).

The \$500,000 federal small business threshold also applies in all provinces and territories, except in:

- Manitoba, where:
 - the lower rate applies to active business income of CCPCs up to a CCPC threshold of \$450,000; and
 - the higher rate applies to active business income of CCPCs from \$450,000 to \$500,000; and
- Saskatchewan, where the CCPC threshold is \$600,000; therefore, the combined rate that applies to active business income from \$500,000 to \$600,000 is 17%.

- See footnote 2 to the table, **Federal Corporate Tax Rates**, for a description of the federal small business deduction clawback and threshold.

The clawback also applies for the purposes of all provincial/territorial small business deductions, except that:

- in Ontario it did not apply for taxation years ending before May 2, 2014 (pro-rated for taxation years straddling May 1, 2014); and
- for Quebec, the \$10 million threshold is based on paid-up capital (on an associated basis).

- For recent and planned changes to the federal small business deduction, see footnote 2 to the table, **Federal Corporate Tax Rates**.
- Rates on investment income are 23.67% higher than the general rates for 2018 (see the table, **General and M&P Corporate Income Tax Rates**), because:
 - CCPC investment income does not benefit from the 13% federal general rate reduction; and
 - the rates on investment income include a 10 $\frac{2}{3}$ % tax that is refundable when the CCPC pays taxable dividends.

See also "Refundable Investment Tax" in the table, **Other Federal Corporate Tax Rates for 2018**, and footnote 2 to that table for recent changes to the refundable investment tax.

15. Recent changes to Quebec's CCPC rates that apply for taxation years beginning after December 31, 2016:

- require a CCPC to meet additional criteria (i.e., number of hours paid, percentage of activities in the M&P and primary sector) to be eligible for the province's regular CCPC rate;
- increase the regular CCPC rate in certain cases;
- extend the M&P CCPC rate to CCPCs in the primary sector (i.e., agriculture, forestry, fishing and hunting, mining, quarrying, and oil and gas extraction); and
- determine the percentage of activities attributable to M&P and primary activities based only on labour costs (assets are no longer a factor).

16. Recent and planned Quebec changes are shown in the following table:

	Quebec changes effective after December 31, 2013		
	From	To	Effective
CCPC rate (M&P)	8%	6%*	June 5, 2014
	6%*	4%*, **	April 1, 2015

	7%	6%	January 1, 2019
	6%	5%	January 1, 2020
	5%	4%	January 1, 2021

* For taxation years beginning before January 1, 2017, the rates apply to all active business income up to \$500,000 if 50% or more of the CCPC's activities are attributable to M&P (based on M&P assets and labour). If this percentage is under 50% and over 25%, the rates will increase proportionately (straight line) to 8% (i.e., the rate is 8% when the M&P percentage is 25% or less).

** For taxation years beginning after December 31, 2016, the 4% rate applies to all active business income up to \$500,000 if 50% or more of the CCPC's activities are attributable to M&P and the primary sector (based on M&P and primary sector labour). If this percentage is under 50% and over 25%, the rates will increase proportionately (straight line) to the regular CCPC rate, or the general rate, depending on the circumstances (i.e., the rate is the regular CCPC rate [for 2018, 8% before March 28, 2018 and 7% after March 27, 2018], or the general rate [for 2018, 11.7%], when the M&P and primary sector percentage is 25% or less).
